

Wireless Charger User instruction

Model: YFJ-099

Version: V1.0

1. Technical parameters

Model number	YFJ-099
Wireless charging standard	Qi wireless charging international standard
Input voltage	DC5V---2A
Input interface	Micro-USB
Input power	5W
Transmitting distance	5~7mm
Charging efficiency	≥73%
Protection measures	When charging abnormally, purple light on and charging stop. it continues to work when problems away .
Charging indicator	, Standby—red LED , Charging—blue, Full power—green
Body size	D: 69.5mm H: 10 mm
Color	black、white

二. Product Description and Operation Instruction

- ① Micro USB input interface for plugging charging cable with an 5V 2A adapter, red LED bright indicates the device is on.

②Put your device directly onto the circle charging area, blue light indicates the device begins to charge. **The max coupling charging area for products is in 65 cm².**

③ Led indicator and color :Standby-red LED, Charging-blue LED. Full power-green LED (only the device which has function of indicating full power)

三. Caution !

1. Please use 2A adapter while charging , otherwise it will affect the charging efficiency
2. Protective cases of smart phone that exceed 2mm thick cases prevent the charger from working and may have to remove before wireless charging.
3. Metal Protective cases of smart phone prevent the charger from working and have to remove before wireless charging.
4. If purple LED is bright, it means smart phone is not in the charging area and over temperature protection will be on to protect circuit, the device stop charging . Then it will charge again after it cool down to a safe value
5. Please keep the product 20cm away from four body when the product is working

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
